

a

n.r. = not reported in the source publication. Olomitutu et al. 2022 (Genes 13:2350) report only mean MAF and mean H_o ; PIC, n_e , AMOVA and pairwise F_{ST} are absent from the published tables and the supplementary marker matrix is not available for re-derivation. Shitta et al. 2022 (Sci Rep 12:4437) does not report n_e or H_o SEM. Cells marked n.r. reflect this data-availability asymmetry, not missing analysis on our side.
